INFORMAL MEMORANDUM

DATE: April 19, 1994

TO: J. Roberson, RFO, AMER

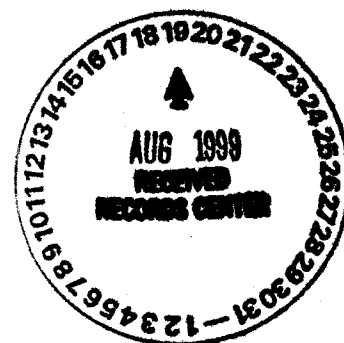

FROM: D.F. George, General Engineer, AMER (BOR)

SUBJECT: Possible deletion of Leachate IM/IRA Requirement (OU7)

I was called by Dave Norbury of CDH this morning. We talked about the OU7 Landfill Pond Leachate collection IM/IRA that was agreed upon by the Executive Committee. The schedule for the IM/IRA as part of the surface water IM/IRA dispute requires the IM/IRA document to the regulators by October 15, 1994. Dave indicated that the overall landfill IM/IRA, to close the landfill, was due to the regulators in May, 1995, a lag of only 6 months. He indicated that to do the job right, it would be redundant to do the leachate collection IM/IRA. He proposed that the leachate collection IM/IRA be incorporated in to the over all Landfill IM/IRA due in May. This is what we have been trying all along to accomplish! He anticipates a joint letter coming out from CDH and EPA detailing this decision. He wants to put it past EPA first, before a final decision is made.

I will keep you informed on any developments. I will be seeing Dave on Thursday.
